

Day 8 Task – AI Class Assistant Project

Person 1 Responsibilities

1. Update the frontend UI to display quiz difficulty level, topic tags, and time taken.
2. Ensure the quiz selection page is responsive and user-friendly.
3. Integrate API calls to fetch the updated quiz metadata from the backend.
4. Test UI components for proper rendering of data.
5. Coordinate with Person 2 for API endpoint verification.

Person 2 Responsibilities

1. Update the backend MongoDB schema to include quiz difficulty, topic tags, and time taken.
2. Modify API endpoints to send the new quiz metadata to the frontend.
3. Test updated API endpoints using Postman.
4. Write backend validation for quiz metadata before saving to the database.
5. Coordinate with Person 1 for end-to-end integration testing.
